SUBJECT INDEX - VOLUME 31

Adrenal function, in pregnant rats, 697
Adrenal 11β-Hydroxylase, in pregnant rats, 697
Adrenal 21-Hydroxylase, in pregnant rats, 697
Aerosol Therapy, and lung disease, 761
Agave Sisalana, GC assay of hecogenin and tigogenin in, 661
14-*Alpha*-Hydroxylation, of Withanolides, 671
Androgen, effect on canine prostate, 511
Androgen metabolism, in rhesus monkey, 711
Androgens, effect on 5α-reductase, 485
Androgens metabolism, by spermatozoa, 747
Androgens, metabolites of, in dog bile, 233
5α-Androstane-3α,17α-Diol, effect on canine prostate, 511
5α-Androstane-3α,17α-Diol, metabolism and binding by bovine spermatozoa, 307
Anterior pituitary, effect of progesterone analogs on, 823
Antiserum characteristics, in rabbit, 357
Aromatase, in breast cancer cells, 463
Aromatase, placental, stabilization of, 533

Beclomethasone-17,21-depropionate, in bovine muscle, 347
Bile acid, and cholesterol excretion in the pregnant guinea pig, 799
Bile alcohols, in cerebrotendinous xanthomatosis, 333
Bile alcohols, in rabbit, 319
Biliary metabolites, of androsterone sulfate, 219
Binding, effect of progesterone metabolism, 269
26,27-Bisnorcholest-5-en-3β-ol-24-one partial synthesis, occurrence in *Psammaplysilla purpurea*, 815
Blood sampling technique, rapid and repeated for corticosterone, 523
Brain lesions, in female rat, 151
Breast cancer cells, longterm culture, 463

Canine prostate, effect of 5α-androstane-3α,17α-diol on, 511
Catechol estrogens, in pregnancy and non-pregnancy urine, radioimmunoassay of, 375
2α-Chloro-5α-androstane-3(α- and β-)17β-diol, synthesis of, 605
2α-Chloroandrostan-3(α- and β-)-ol-17-one, synthesis of, 605
Cholecalciferol, thermal transformation, 23
Cholecalciferol -23,24-^{3}H, 25-hydroxy, synthesis of, 645
5α-Cholestane-3α,7α,12α,24β-tetrol, identification of, 319
5β-Cholestane-3α,7α,12α,25,26-pentol, identification of, 319
5β-Cholestane-3α,7α,12α,23β-tetrol, identification of, 333
5β-Cholestane-3α,7α,12α,24α-tetrol, identification of, 333
5β-Cholestane-3α,7α,12α,24β-tetrol, identification of, 319, 333
5β-Cholestane-3α,7α,12α,25-tetrol, identification of, 319
(24R and 24S)-5β-Cholestane-3α,7α,24,25-tetrols, synthesis and circular dichroism of, 99
(24R and 24S)-5β-Cholestane-3α,24,25-triols, synthesis and circular dichroism of, 99
Cholesterogenesis, participation of propionate in, 593
Cholesterol, 7α-hydroxylase activity of, 849
Cholesterol absorption, in gastrointestinal tract, 227
Cholesterol side-chain cleavage enzyme, influence of cryptorchidism on, 189

Cholic acid synthesis, effects of taurocholate on, 809
Chromatographic separation, of vitamin D_3 sulfate and vitamin D_3, 653
Chromatography, of estrogen conjugates by high pressure, 583
Corticoids, and asthma, 347
Corticosteroids, hydroxylated identification of, 289
Corticosteroids, in neonatal urine, 9
Cortisol, identification of hydroxylated derivatives, 289
Cortisol, identification of new derivatives, 501
Cryptorchidism, effect of, on cholesterol side chain cleavage enzyme, 189
Cumene hydroperoxide, effect of, on aromatase, 533
Cytochrome P-450, effect of spironolactone on, 771

Danazol (17α-pregna-2,4-dien-20-YNO[2,3-d]isoxazol-17-ol), radioimmunoassay of, 205
24,28-Dehydroaplysterol, occurrence in sponge, 815
1,2-Dehydrocorticosteroid, naturally occurring in a vertebrate, 573
1,2-Dehydro-11-dehydrocorticosterone, isolated from skate bile, 573
Dehydroepiandrosterone, metabolism of, by human mammary tumors, 113
Dexamethasone, use in exchange assay for glucocorticoid receptor, 427
Dicyclohexylcarbodiimidonium methiodide, use of, as reagent, 453
Diethylstilbestrol, metabolism of, 471
Dihydrotestosterone, extrasplanchnic origin of, in blood, 439
Dihydrotestosterone, metabolism and binding by bovine spermatozoa, 307
3β,15α-Dihydroxyandrost-5-en-17-one, in human pregnancy urine, 613
2,3-Dihydroxyestra-1,3,5(10)-triene-17-one, radioimmunoassay of, 249
3β,15α-Dihydroxypregn-5-en-20-one, in human pregnancy urine, 613
3,17-Dihydroxy-1,3,5(10)-trien-16α-yl-β-D glucopyranosiduronate, radioimmunoassay in urine, 407
3,20-Dioxo-4-pregnene-18-carbonitrile, hydrolysis of nitrile, 367
Disulphates, of 16-oxygenated ketonic C_{19} steroids, biliary metabolites of androsterone sulphate, 219
Dithiothreitol, effect of, on aromatase, 533
Dog, testosterone metabolites in, 233

Ecdysones, tlc chromatography of, 139
Enzyme-immunoassay, in rabbit, 357
Epididymal spermatozoa, androgen metabolism by, 747
Epididymis, androgen concentration and partial characterization of 5α reductase, in the rhesus monkey, 129
Epididymis, 5α-reductase activity in 485
4β,5-Epoxy-5β-androstan-3-ones, reactions with hydrogen fluoride in pyridine, 49
Estradiol, post partum patterns of, 731
Estradiol-17β conjugation, in rat liver, 151
Estra-1,3,5(10)-trien-3,17β-diol, effects of, on steroid hydroxylase induction, 1
Estra-1,3,5(10)-triene-3,15α,16α,17β-triol, formation of, in human pregnancy, 627
Estra-1,3,5(10)-triene-3,15α,17β-triol, formation of, in human pregnancy, 627
Estrogen, effect of, on LH stimulation, 83
Estrogen, in breast cancer cells, 463

Estrogen conjugates; high pressure liquid chromatography separation of, 583
Estrogens, effect on HMG-CoA reductase, 841
Estrogens, synthetic of, 471
Exchange assay, for the cytoplasmic glucocorticoid receptor in the liver of the rat, 427
Extrasplanchnic origin, of blood dihydrotestosterone, 439

Fluorescence quenching, in tlc chromatography of ecdysones, 139

Gastrointestinal tract, bile acid absorption, 227
Glucocorticoid receptor, assay by exchange, 427
Glucocorticoid receptors, in airways muscle, 347

hACTH and related peptides, steroidogenic activity on the fetal adrenal in organ culture, 557
High pressure liquid chromatography, of estrogen conjugates, 583
HMG-CoA reductase, stimulation by estradiol, 841
Human fetal adrenal cortex, in organ culture, 557
Hydrogen fluoride in pyridine, reaction with 4β, 5-epoxy-5β-androstan-3-ones, 49
17β-hydroxyandrost-4-ene-3, 11-dione, radio-GC assay of, 691
25-hydroxycholecalciferol-23,24-^{3}H synthesis of, 645
19-hydroxy-cholesteryl-3β-acetate, synthesis of, 453
3-hydroxyestra-1, 3, 5(10)-trien-17β-yl-β-D-glucopyranosiduronate, radioimmunoassay in urine, 407
2-hydroxyestrone, radioimmuno assay of, 249
7-hydroxylated dehydroepiandrosterone, and derivatives, competition of, for the estrogen receptor, 113
3β-hydroxy-20-oxo-5-pregnene-16α-carbonitrile, effect of, on cholesterol metabolism, 849
6β-hydroxy-progesterone, hydrogenation of, 495
Δ^{5}-3β-hydroxysteroid dehydrogenase, influence of cryptorchidism on, 189
Hypothalamus, effect of steroids on, 823

Immature rats, LH stimulation of, 83
Immunization, raising levels, in rabbit, 357
19-iodo-cholesteryl-3β-acetate, synthesis of, 453
Isopyrocholecalciferol, formation between 100-170°, 23

Leydig cells, LH stimulation of, 83
Liver cholesterol metabolism, effect of catatoxic steroid on, 849
LH stimulation, effects of steroids on, 83
Lung disease, aerosol treatments, 761

Marine sterols, MIKE spectrometry analysis of, 31
Mediobasal hypothalamus, estradiol-17β in, 151
Metabolism, progesterone, in rat, 269
Metabolism in bile, of testosterones, 233
Metabolism, of androgen, in rhesus monkey, 711
24-methyl-25-homo-5β-cholane-3α,7α,12α-24-tetrol, identification of, 319
3-methoxy-3, 5-dienes, photooxidation of, 495

Microbial transformations, of antitumor agents, 671
MIKE spectrometry, of marine sterol mixtures, 31
Mucociliary clearance, and aerosols, 761

Neonate, cortisol in, 501

Oral contraceptives, effects of, on steroid hydroxylase induction, 1
17-oxoestra-1,3,5(10)-trien-3-yl-β-D-glucopyranosiduronate, radioimmunoassay in urine, 407

Pituitary, progesterone receptor in rat, 69
Plasma cholesterol, and bile acid excretion in the pregnant guinea pig, 799
Precholecalciferol, transformation between 100-170°, 23
5α-pregnan-3β-ol-20-one, occurrence in sponge, 815
Pregnant guinea pig, bile acid and cholesterol excretion in, 799
5β-pregna-3α,7ξ,11β,17,21-pentol-20-one, identification of, 501
Pregn-4-ene-3,20-dione, radioimmunoassay of, 393
Pregn-5-en-3β-ol-20-one, occurrence in sponge, 815
5β-pregn-6β-ol-3,20-dione, synthesis of, 495
Progesterone, post partum patterns of, 731
Progesterone, radioimmunoassay of, 393
Progesterone metabolism, in rat, 269
Progesterone receptor, in rat, 69
Progesterone 5α-reductase, effect of steroids on, 823
Prolactin, post partum patterns of, 731
Propionic acid, participation of, in cholesterol biosynthesis, 593
Prostate, characterization of unoccupied (R) and occupied (RA) androgen binding components in the hyperplastic prostate, 541
Prostate glands, metabolism in, of 5α-reduced androgens, 259
Pyrocholecalciferol, formation between 100-170°, 23

Radio-gas chromatography, for measurement of 11-oxotestosterone, 691
Radioimmunoassay, for corticosterone, in plasma, 523
Radioimmunoassay, for danazol, 205
Radioimmunoassay, of catechol estrogens, 375
Radioimmunoassay, of estrogen glucosiduronates, 407
Radioimmunoassay, of 2-hydroxyestrone, 249
Radioimmunoassay, of progesterone, 393
Rat liver, exchange assay for glucocorticoid receptor, 427
Receptor, progesterone, in rat, 69
Receptors, characterization of unoccupied (R) and occupied (RA) androgen binding, of the hyperplastic human prostate, 541
Receptors, glucocorticoid, exchange assay for, 427
5α-reductase, androgen concentration and partial characterization of, in the epididymis of the rhesus monkey, 129
5α-reductase, effect of androgens on, 485
Rhesus monkey, androgen concentration and partial characterization of 5α reductase, in the epididymis, 129
Rhesus monkey, androgen metabolism in, 711
Ring A reduced 6-hydroxylated corticosteroids, synthesis of, 9

Seminal vesicles, metabolism of, in 5α-reduced androgens, 259
Serum LH, relationship with serum progesterone, 175

Serum progesterone, relationship with LH serum, 175
Sex hormone, binding globulin of, 681
Skate bile, a 1,2-dehydrocorticosteroid isolated from, 573
Spermatozoa, androgen metabolism and binding by, 307
Spermatozoa, metabolism of androgens by, 747
Spironolactone, effect of, on plasma testosterone, 771
(25R)-5α-spirostan-3β-ol, GC assay of, 661
(25R)-5α-spirostan-3β-ol-12-one, GC assay of, 661
Sponge sterols, isolation of, 815
Steroid hydroxylase, induction of, in cell culture, 1
Steroid metabolism, of diethylstilbesterol, 471
Steroidogenesis, participation of propionate in, 593
Steroid sulfates, purification of, 783
Stress response, corticosterone effect of, in rats, 523
17-substituted 2α-chloro-5α-androstan-3-ols, synthesis of, 605
18-substituted progesterones, synthesis of, 367
Sulfatase, purification of, 783

Taurocholate, effects of, 809
Testis, metabolism of 5α-reduced androgens in, 259
Testosterone, estradiol binding globulin for, 681
Testosterone production, effects of steroids on, 83
Thin-layer chromatography, of ecdysones, 139
Trichloroacetic acid and antimony trichloride, reaction with cholesterol, 163
3α,7α,12α-trihydroxy-5β-cholestan-26-oic acid, conversion to cholic acid, 809
Triphenylphosphine/N-iodosuccinimide, use of, as reagent, 453
Tritium labeled 25-hydroxyvitamin d_3, preparation of, 645

Urinary 2-hydroxyestrone, radioimmunoassay of, 375
Urinary pregnanediol concentrations, in women, 175

Vitamin d_3, 25-hydroxy, 23,24-^{3}H labeled, 645
Vitamin d_3 sulfate, chromatographic separation, 652

White carneau pigeons, bile acid absorption, 227
Withaferin-A, 14α-hydroxylation of, 671
Women, LH serum relationships in, 175
